Camera Recording Status

- N/A No recording is occurring.
- Scheduled recording is active and the system is continuously recording video.
 - Motion is occurring in one or more motion zones and the system is recording the video as a motion event.
 - An external alarm is active and the system is recording the video as an alarm event.
 - Pre-alarm recording has been enabled and is currently active. The system will record up to two minutes of video prior to the start of a motion or alarm event.
 - The video signal has been lost or the camera is unreachable. The system is **not** recording video, even if it has been configured to do so:
 - ... and scheduled recording is currently active.
 - ... and an external alarm is active.
 - ... and motion has been detected.
 - ... and pre-alarm recording has been enabled and is currently active.
